CODING ADVENTURE

Continue your Coding Adventure with us if you had fun at Coding Olympic Singapore! Enter an educational game-based environment where students learn to code in a real programming language to develop and generate unique and personalized apps and websites. Coding Adventure fosters the development of executive functioning skills, such as problem solving and planning as well as geometric and mathematical thinking.

Plus, students will get to deepen their knowledge by advancing into Coding Adventure series 2 with the same team of trainers from Coding Olympic and go through 70 intermediate challenges.

Learn Fun Concepts

| Statements and arguments | Objects, loops and variables | Arrays, functions and conditions | Boolean logic and etc |
